Just like Talk to Aya and Talk to Yuno I really like this game. I wish that new dialogues will be added. It will be really nice if all three will become a more complex and interactable game.. So this is sort-of a companion to Talk to Aya. In this case, you are talking with Saki (who happens to be Aya's best friend). Saki is a more outdoors/energetic type. So there are different keywords you must try, and times to access the "game" to get the achievements.. I only put no because its not exactly a game, I bought it thinking it was one thing and it turned out to be another. You can only communicate with her using certain keywords and phrases it gets kinda dull after a few minutes its unfortunate shes not like Cleverbot or any of those AI-esque programs. That being said its only a \$1.00 so im not exactly annoyed. its a ok program for just killing time.. When i asked Saki about " Football

" . " Huh? What is it? " I cried in British accent.. Not a bad game, though not always play it, developers, add more tags to talk with Saki.. Make it a full game
